

readme

The user info.txt file is a record of the transactional information on the account.

The csv folder contains the file activity for the account, separated by activity in the root and separate shared folders.

The columns are as follows:

timestamp = the time the change took place (in GMT)

user_id = the user id of the person who made the change

path = the path (in Dropbox) of the file

size = the size of the file (if -1, it means it is a delete action. if it's a 0, it's a folder creation action. if it's positive, it's a file upload action)

How to use the Public folder

The Public folder lets you easily share single files in your Dropbox. Any file you put in this folder gets its own Internet link that you can share with others -- even non-Dropbox users!

Step 1: Drop a file into the Public folder.

Step 2: Right-click this file, then choose Dropbox > Copy Public Link. This copies an Internet link to your file that you can paste anywhere: emails, instant messages, blogs, etc.

That's it! To share your file, just send the link to a friend.

Happy Dropboxing!
- The Dropbox Team

P.S. You can only link to actual files within your Public folder, not to folders. For help with sharing files visit <http://www.dropbox.com/help/16>
